

SFK Liechtenstein

The mission of SFK is to empower the human spirit in every child. To teach children to find their voices and to make conscious choices that end the cycle of conflict for themselves and for future generations. The commitment is to give children the tools to realize their full potential and to help them meet life's real challenges. Spirituality for Kids gives children an awareness of themselves, of others, and of the interconnectedness of all things so that they may grow up to become caring and responsible citizens of the world.

The power of SFK's unique programs lies in their ability to translate universal spiritual principles into concrete, practical tools that children can apply to their lives. SFK meets research-based educational best practices by building:

1. Problem Solving: understanding cause and effect, foreseeing the consequences or their actions.
2. Self Esteem and a sense of Autonomy: the power to impact the amount of happiness and satisfaction they bring into their lives by making wise choices.
3. Social Competence Skills: having the ability to see and feel another's perspective, being caring sharing and tolerant with others.
4. A Sense of Direction: knowing their purpose in life is to develop their inherent potential and share with the community and world around them.

These skills, when developed and practiced, build resiliency in children.
